

PORTFOLIO

Creative

Massyk Anastasia

I am a digital designer focused on creating modern digital experiences, visual content, and user-friendly solutions.

This portfolio presents my design projects, web concepts, and creative works that combine visual aesthetics, functionality, and user experience.

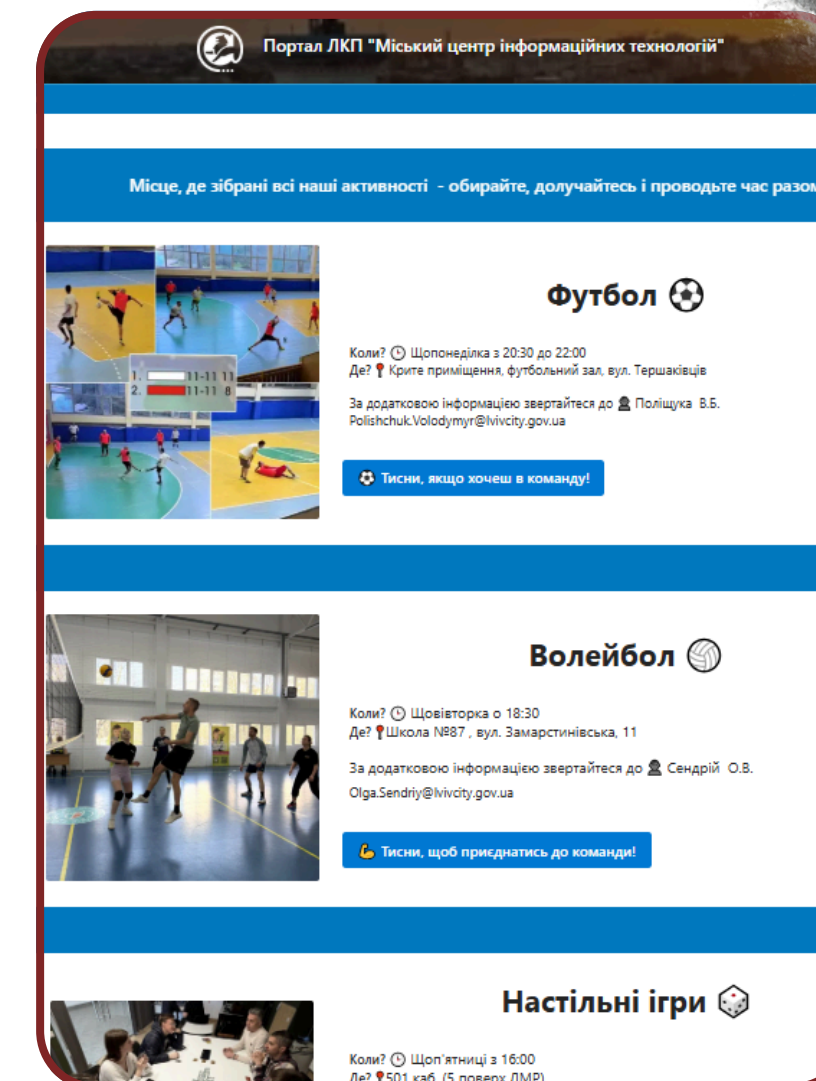

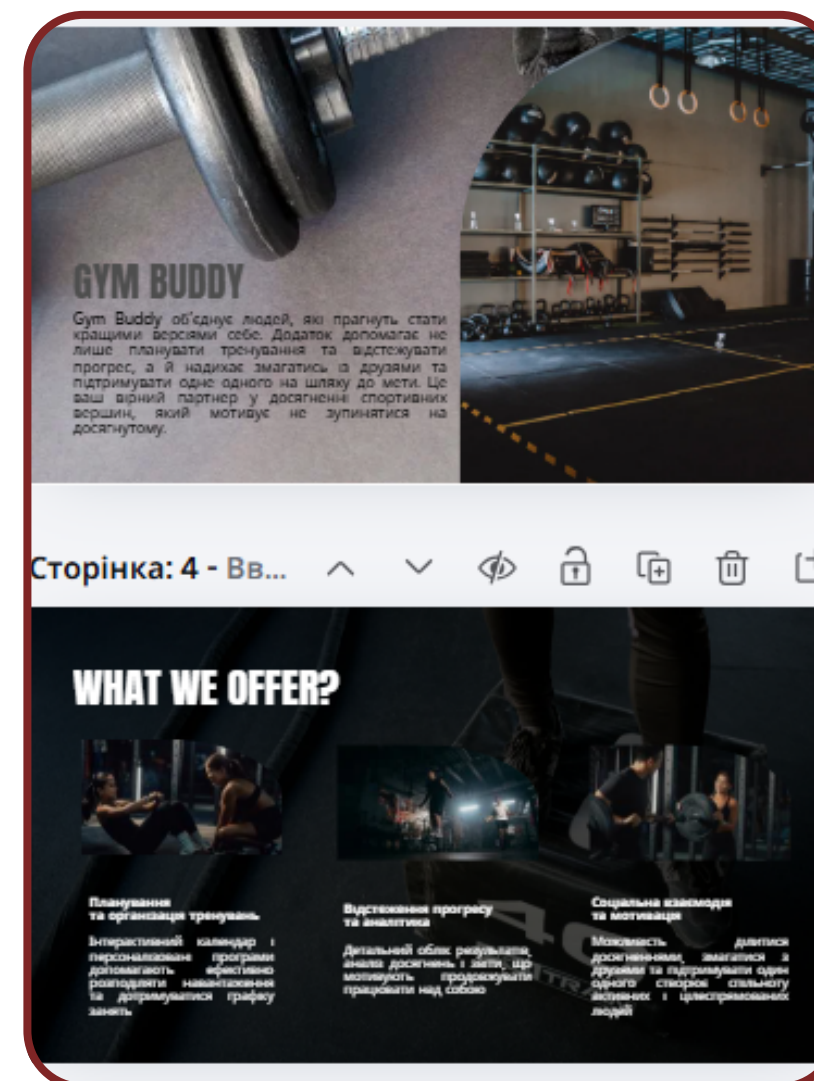

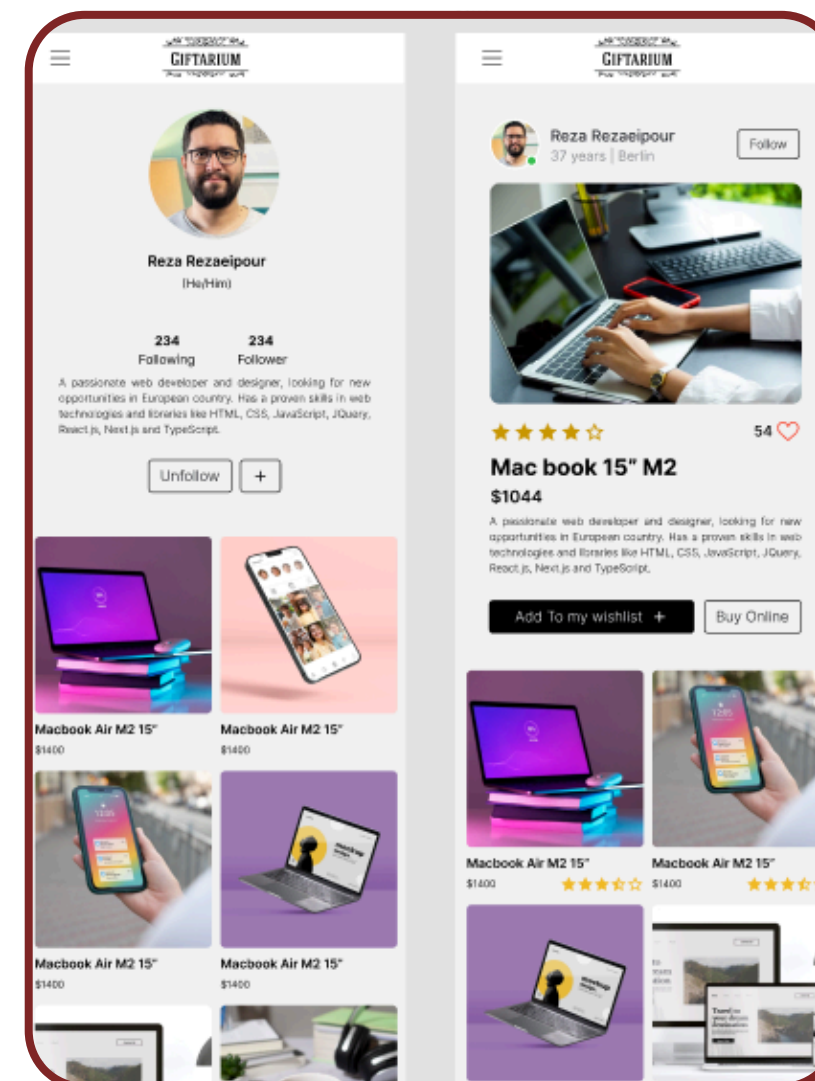

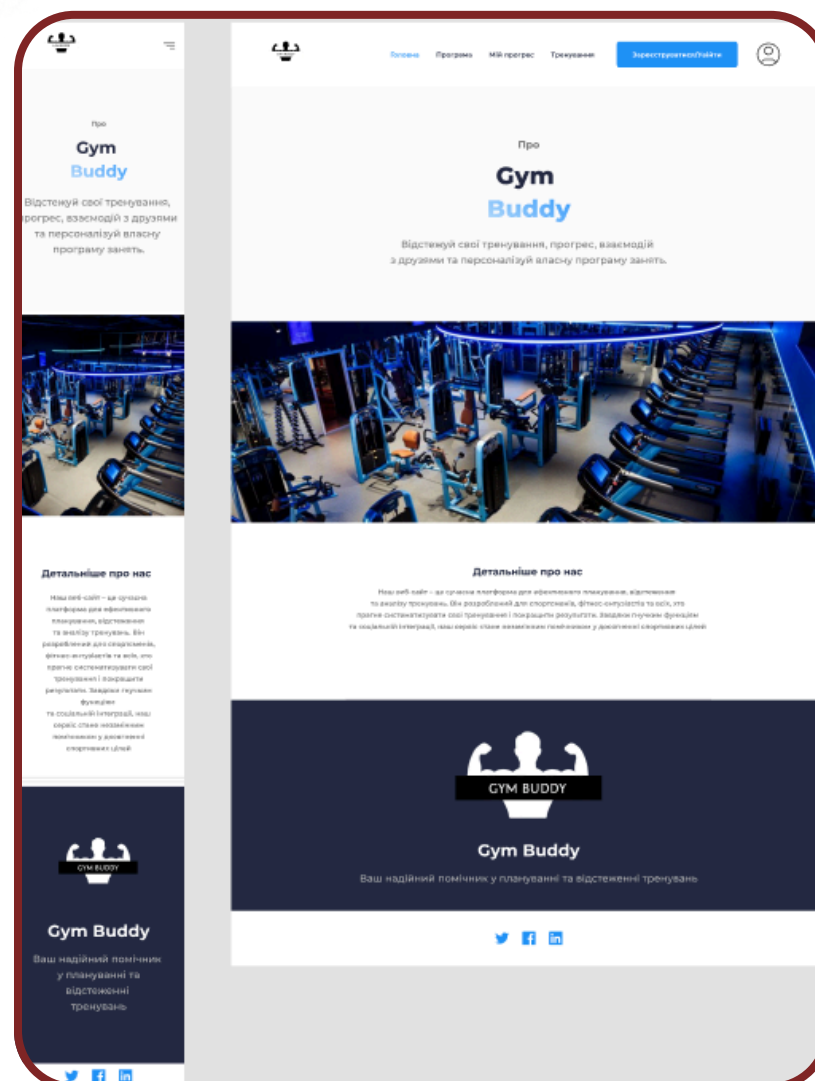

About Me

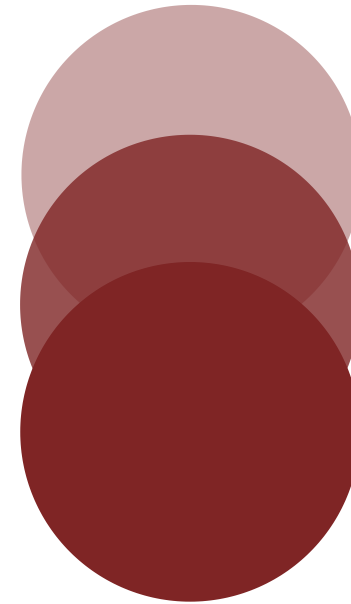

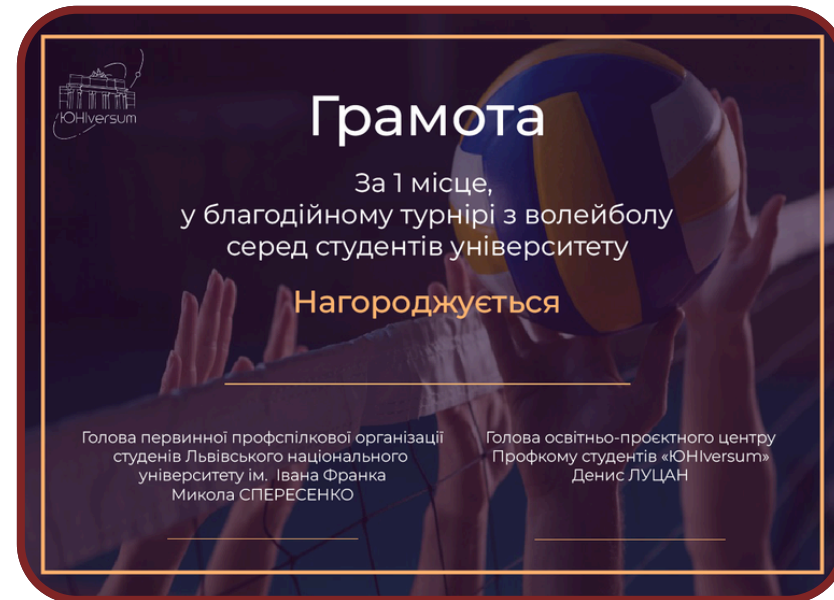

I am a digital designer focused on creating user-friendly digital experiences and visually engaging content.

I design web interfaces, presentations, and graphic materials using Figma and Canva, combining creativity with a structured approach. My experience includes developing visual identities, creating merchandise designs, brand materials, and social media content for projects and organizations.

I also work with Microsoft 365 tools and develop digital solutions, including internal SharePoint portals designed to improve information organization and user interaction. I am continuously growing in the UI/UX field, combining design skills, technology, and a strong focus on user experience.

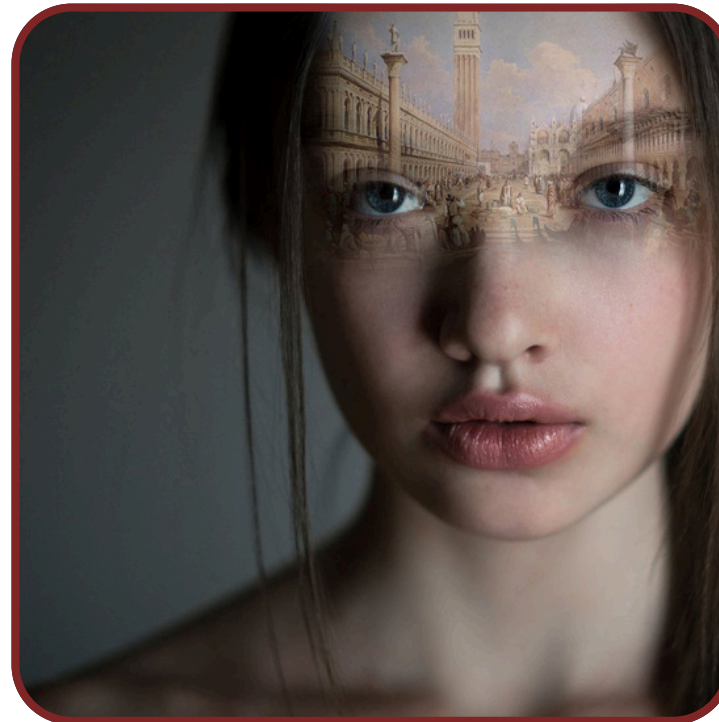

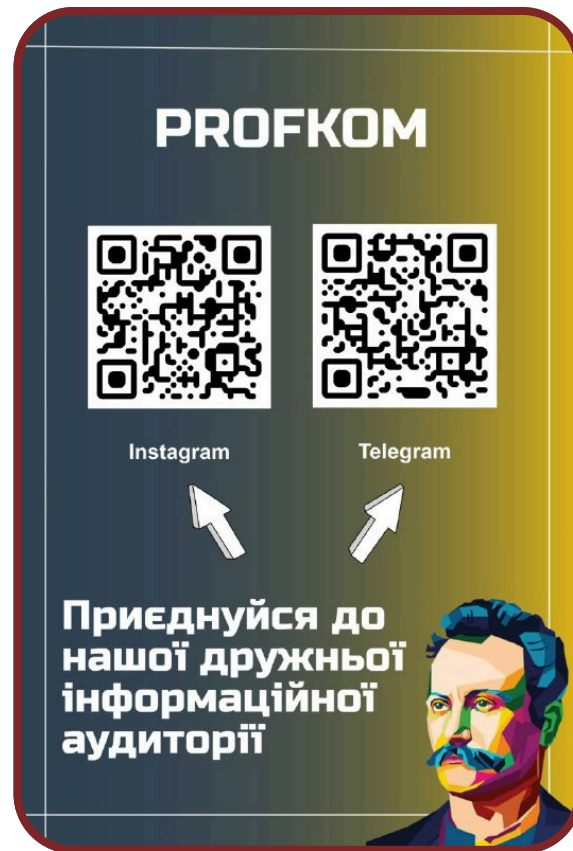

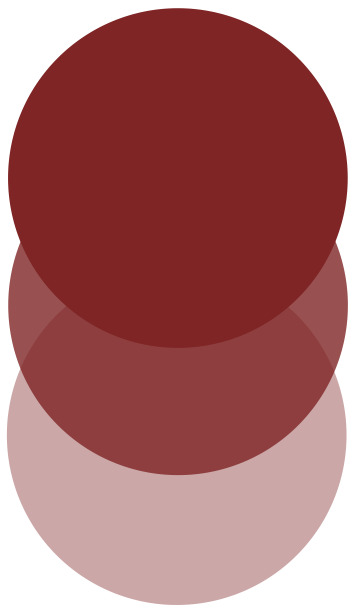

A black and white photograph of a hand, likely a woman's, with a ring on the ring finger. The hand is positioned with the index finger pointing towards the right. The background is dark and textured, possibly a wall or a piece of fabric. The lighting is dramatic, highlighting the contours of the hand and the ring.

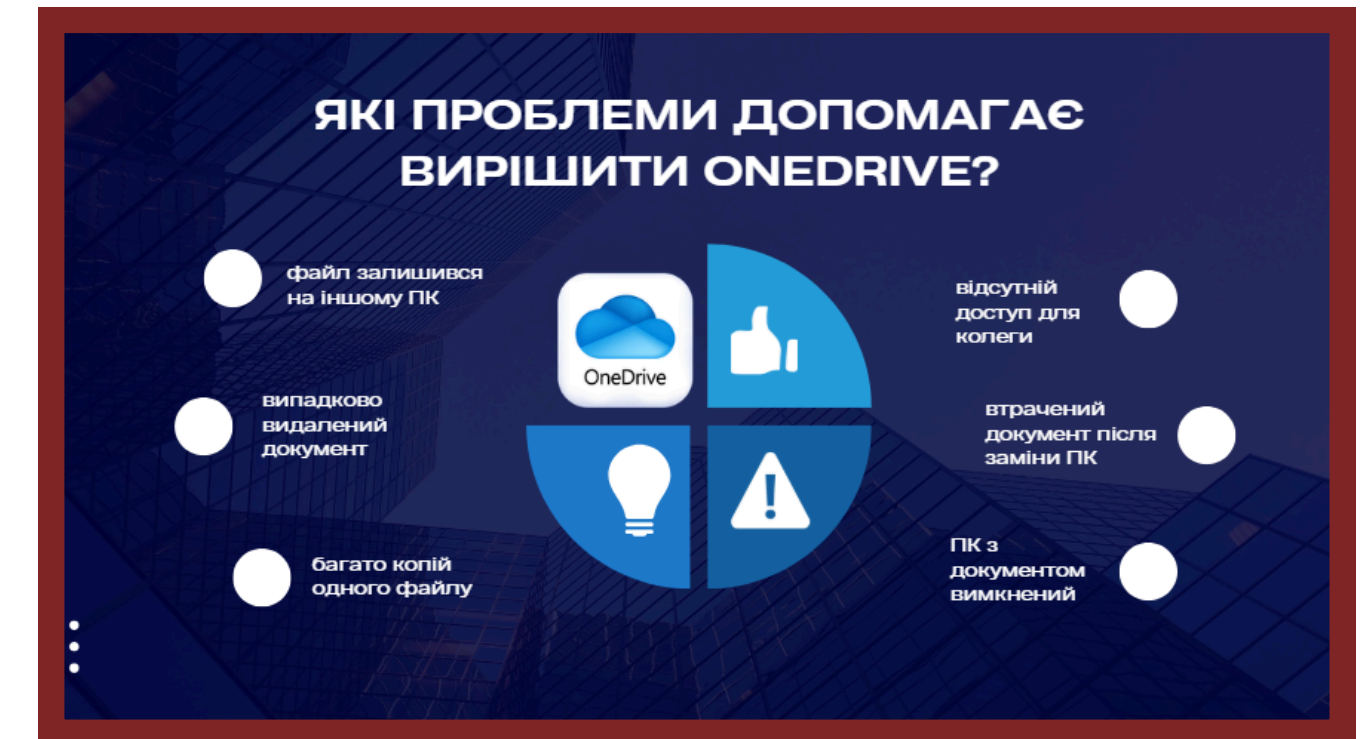

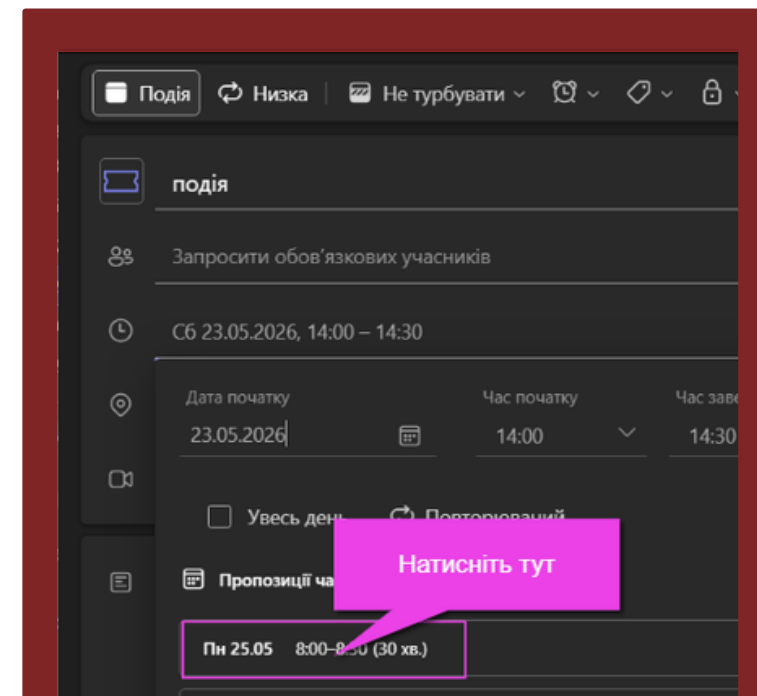

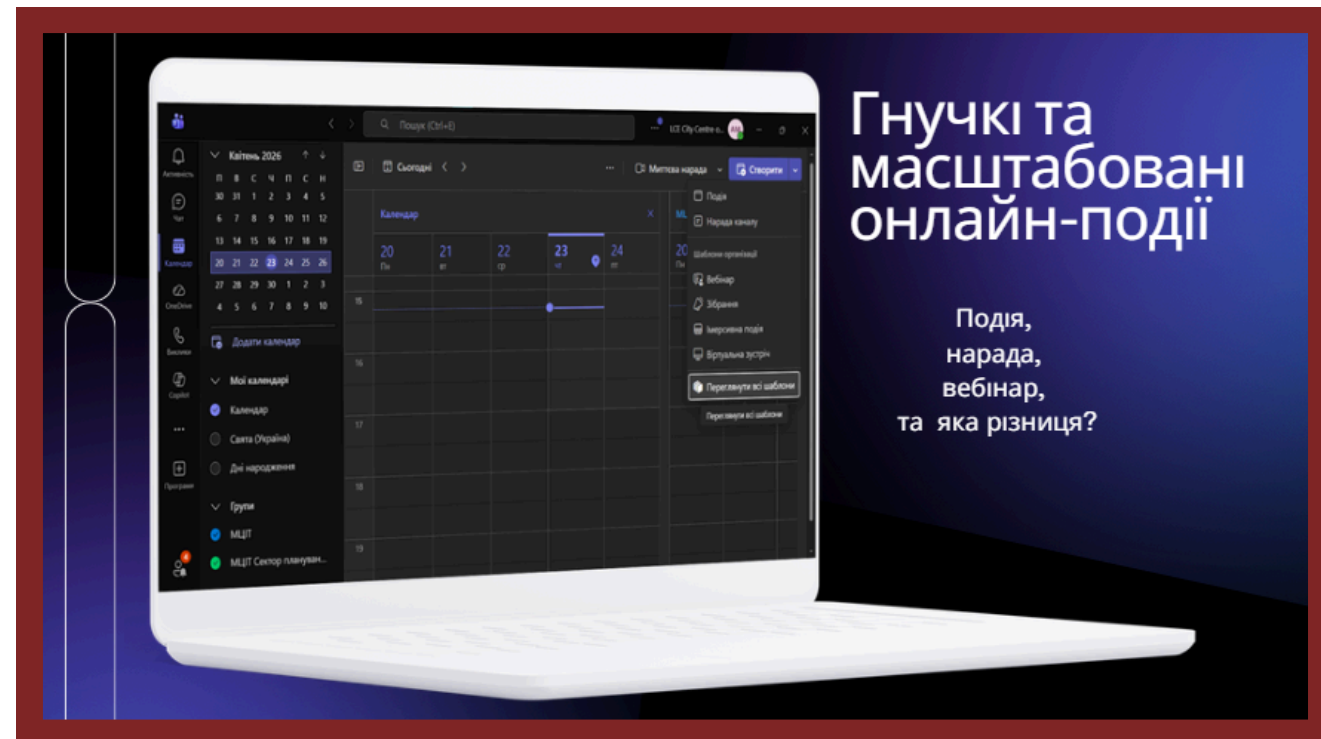

My Design Experience

With experience in UI/UX design, branding, and digital content creation, I develop solutions that combine visual appeal with usability. Over the past three years, I have worked as a designer for three student organizations, creating branding, merchandise, social media content, presentations for IT projects, and promotional materials. I also design high-quality learning materials for corporate training and develop user-oriented digital solutions, including internal SharePoint portals.

Learning & Educational Materials

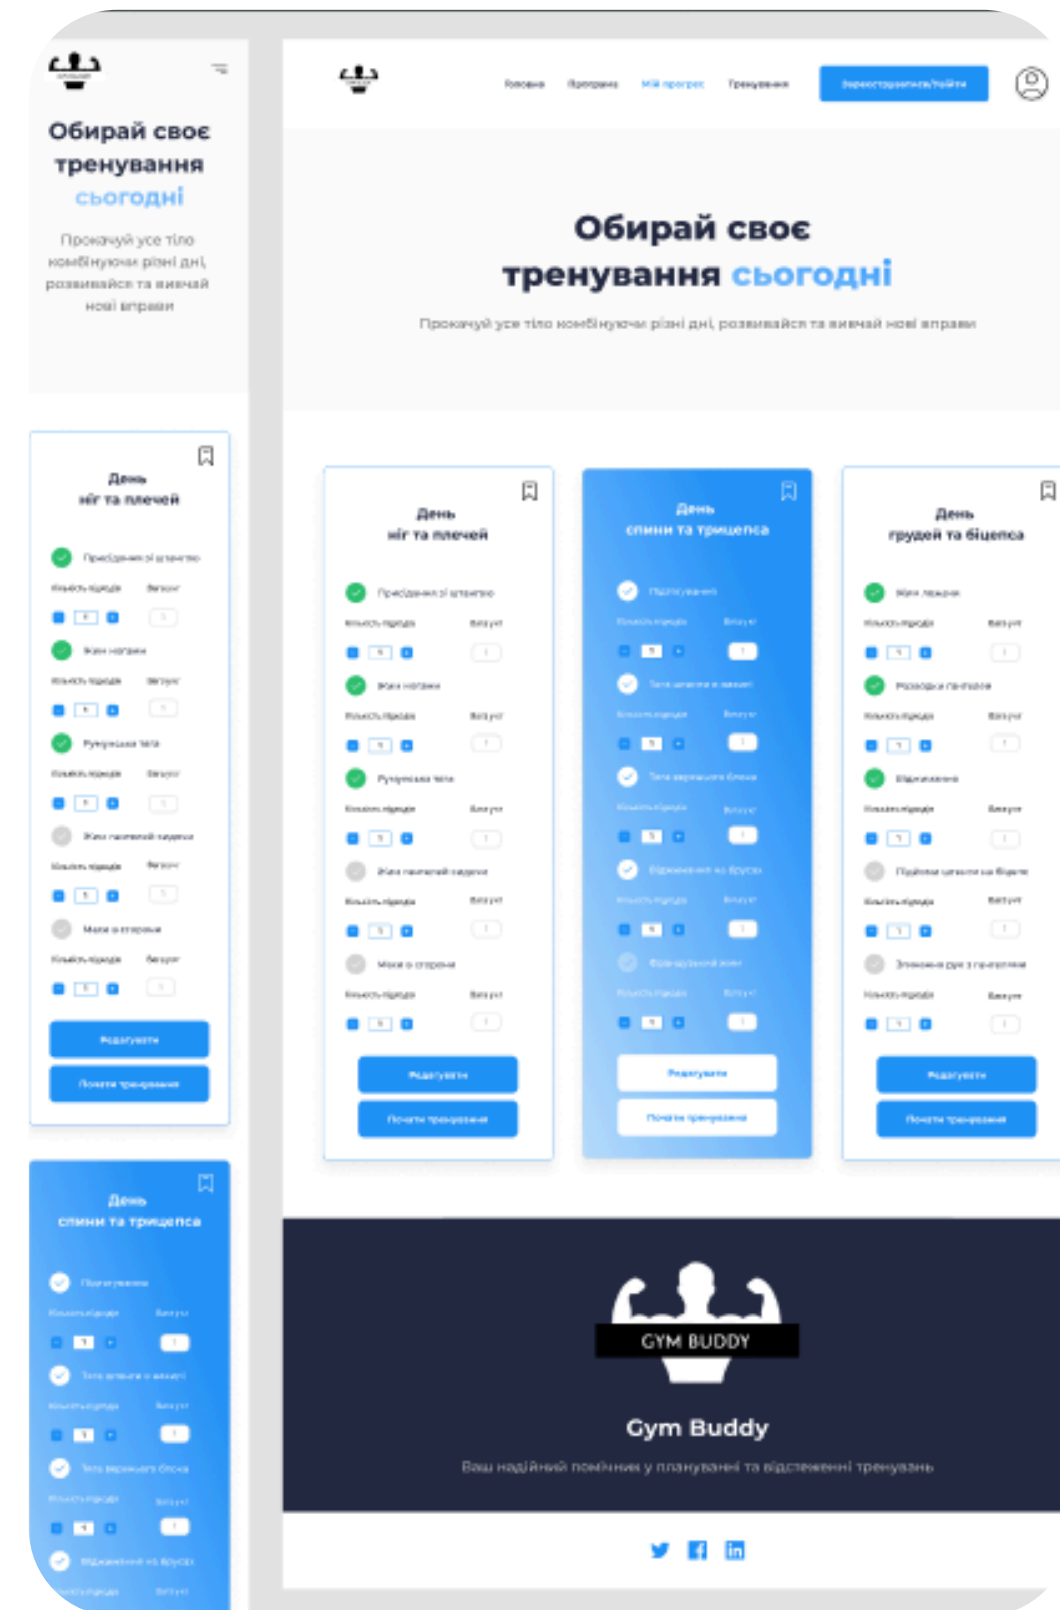

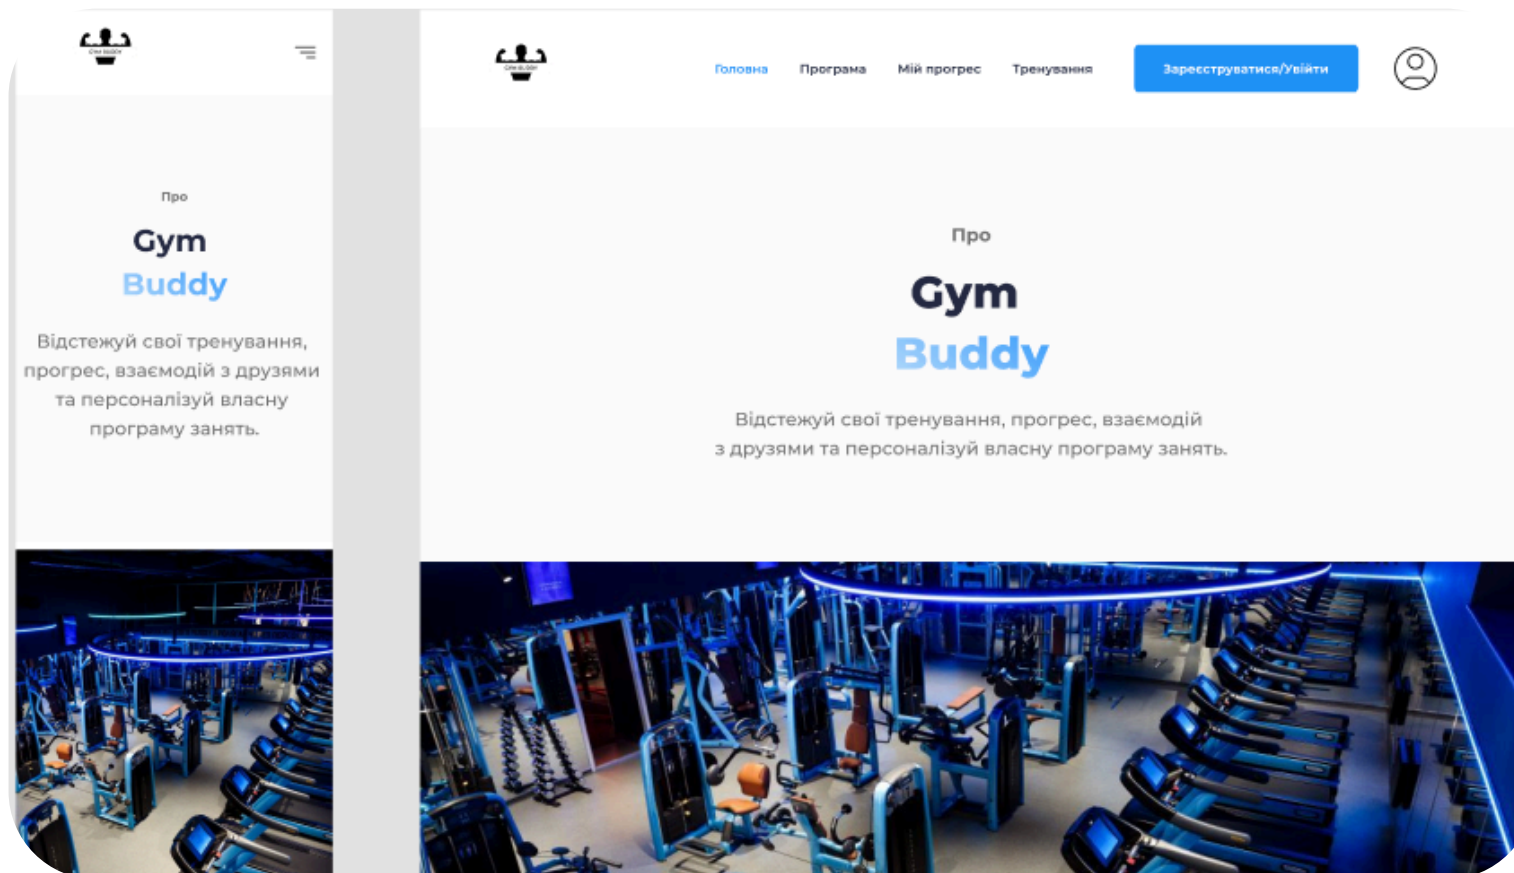

I create educational and informational materials using Canva, focusing on clear structure, visual hierarchy, and accessible presentation.

Figma Project 1

GymBuddy — Fitness Web Platform

A web platform designed to help users plan and organize their workouts efficiently. The project includes responsive desktop and mobile layouts, a landing page, workout templates, user authentication, and a workout calendar for tracking training schedules.

Figma Project 2

Giftarium — Wishlist Mobile App

A mobile app concept that makes gift planning simple and organized. The design includes user authentication, wishlists, event calendars, friend profiles, gift reservation features, and a user-friendly interface for sharing and managing gifts.

Skills & Tools

- Figma — UI/UX design, wireframes, prototypes, and responsive layouts
- Canva — presentations, learning materials, and visual content
- Adobe Illustrator — vector graphics, branding, and marketing materials
- Adobe Photoshop — image editing, mockups, and digital graphics
- Blender — 3D modeling and product visualization
- WordPress — website creation, customization, and content management
- Microsoft 365 — SharePoint, digital solutions, and collaboration tools

Featured Project

I combine creativity, technical skills, and user-centered thinking to create meaningful digital experiences.

I am continuously growing in UI/UX design, digital solutions, and visual communication, always looking for new challenges and opportunities to improve. As a dedicated and creative designer, I am ready to collaborate on inspiring projects, bring ideas to life, and create solutions that combine aesthetics, functionality, and real user value.
