About me

A **digital solutions designer** with experience in creating visual content, user-oriented materials, and digital products.

I create presentations, graphic materials, and design components using **Canva and Figma**. I work on project identity development, including designing student **organization merchandise** (certificates, brand book, badges) and creating **content for social media**.

I work with **Microsoft 365 tools**, including developing an internal SharePoint portal focused on convenient information management and user interaction. I am developing in the **UI/UX design** field, combining visual thinking, technical skills, and a focus on user experience.

Experience

- LKP "City Information Technologies Center" April 2026 – Present

- Creating and updating information content for users
- Improving UX of internal digital products
- Analyzing user needs and implementing UX solutions
- Developing training materials, user guides, and video tutorials
- Creating visual materials in Canva and interactive guides in ActivePresenter
- Conducting corporate training sessions on Microsoft 365 tools
- Collaborating with teams to implement digital solutions

- Volunteer October 2024 – January 2025

Volunteer Coordinator
